

TOWN OF JACKSON

TOWN COUNCIL

AGENDA DOCUMENTATION

PREPARATION DATE: September 12, 2018
MEETING DATE: September 17, 2018

SUBMITTING DEPARTMENT: Planning
DEPARTMENT DIRECTOR: Tyler Sinclair
PRESENTER: Tyler Sinclair

SUBJECT: P17-074: Snow King Mountain Resort On-Mountain Improvements Project Proposal - United States Forest Service - Scoping Comments

STATEMENT/PURPOSE

The purpose of this item is to have Town Council consider providing scoping comments to the United States Forest Service related to the Snow King Mountain Resort On-Mountain Improvements Project Proposal.

BACKGROUND/ALTERNATIVES

At the September 10, 2018, Joint Information Meeting (JIM) Mary Moore, the Bridger-Teton National Forest District Ranger provided Town/County elected officials information regarding their role as Cooperating Agencies in the Forest Service Snow King review process. Ms. Moore advised the elected officials that if they had areas/topics that they wanted to ensure were included in the next steps in the review process including the alternative analysis those comments should be submitted by the October 4, 2018 deadline. More specifically Ms. Moore advised that providing direction on the "why" certain areas/topics should be further considered would be beneficial.

To assist in this consideration staff has provided below a summary of issues identified during the Snow King Stakeholders engagement process (from a total of 88 issues identified during the First Public meeting) to assist in area/topic identification.

• Gondola Landing	• Front of Mountain Trails
• Ice Rink	• Uphill Access
• Community Center and Climbing Gym	• Lots 53, 57, and 58
• West Portal	• East Portal
• Parking	• Housing
• Zip Line	• Town of Jackson Commitments
• Boundary Expansion/Road	• Snow King Resort Master Association Commitments
• Summit	• Snow King Mountain Commitments
• Back Side of the Mountain	•
• etc.	•
•	•
•	•
•	•

Once/if areas and topics are identified, Council could consider "why" each should be considered under various alternatives or considerations. To assist in the "why" staff has provided below the "interests" identified during the Snow King Stakeholders engagement process as follows:

- Conservation of wildlife habitat and wildlands
- Economic viability of Snow King Mountain recreation and resort area
- Diversity of year-round recreational opportunities for diverse user groups
- Community accessibility and affordability
- Preservation of the cultural, environmental, and historical character of Jackson
- Prioritization of community safety
- Availability of high-quality facilities
- Minimized impacts to the surrounding areas.
- Consideration of impacts to infrastructure and services, both positive and negative
- Balanced impacts of development and tourism on the community, both positive and negative, that can serve as a model for others
- Consideration of community-wide educational opportunities
- Consideration for holding events
- Broadened appeal of the offerings and amenities at Snow King Mountain
- Clear and concise guiding documents to clarify rights, responsibilities, and accountability for all parties involved in the future of Snow King Mountain
- Maintained and enhanced world-class training and facilities
- Prioritization of environmental sustainability
- etc.

Staff has attached the Forest Service request for public comment document that provides a summary of the Snow King proposal, as well as a link to the full application below under attachments. In addition, staff has provided the Snow King Stakeholders Group final summary documents.

Based upon discussion at the meeting Council could direct staff to draft a letter to the United States Forest Service providing what areas/topics have been identified and "why" for Council consideration at the October 1, 2018 Town Council meeting.

STAKEHOLDER ANALYSIS

The stakeholders involved in this issue include Snow King Mountain Recreation, the Town of Jackson organization, all patrons and users of Snow King Mountain, and the community at large.

ATTACHMENTS

- United States Forest Service, letter dated August 3, 2018
- Snow King Mountain Stakeholder Group, Staff and Consultant Summary of Outcomes and the Process, May 17, 2018
- Snow King Vision Stakeholder Group Final Vision Scenarios - May 17, 2018

FISCAL IMPACT

None

STAFF IMPACT

The staff impact will be significant by many Town/County Departments reviewing and making recommendations on the proposed plans. To date, Town staff has invested about 250 hours on the Snow King

Master Plan update process to coordinate and support the Snow King Vision Stakeholder Group. Most of that time is from the Town Planning Director.

LEGAL REVIEW

This item has not been provided to the Town Attorney for review.

RECOMMENDATION

The Planning Director has not provided a recommendation on this item.

SUGGESTED MOTION

I move to direct staff to draft a letter to the United States Forest Service outlying the scoping comments provided by Council at this meeting for consideration at the October 1, 2018 Town Council meeting.

Re: Snow King Mountain Resort On-mountain Improvements Project Proposal

Dear Interested Party:

On June 5, 2018, Snow King Mountain Resort (Snow King) submitted a proposal to the Bridger-Teton National Forest (Bridger-Teton) to initiate the environmental review process for improvements proposed in Snow King's master development plan on National Forest System lands. The Bridger-Teton accepted the proposal and is initiating a review in accordance with the National Environmental Policy Act (NEPA). We anticipate preparing an environmental impact statement (EIS) using a third party consultant.

The proposal was finalized by Snow King after a multi-year public input process that culminated in a facilitated community stakeholder group organized by the Town of Jackson. This group developed four scenarios of different combinations of improvements, and ultimately Snow King selected a combination of elements that the ski area believed best fit the needs of the resort and the community's desires.

The purpose of this letter is to invite public comment on the scope of the EIS – that is, on the issues and alternatives it will address. We invite you to inform us of any concerns you may have about potential environmental impacts of this project and any design features that might reduce those impacts. This scoping letter states the purpose and need of the proposed project, describes Snow King's proposed action in detail, and provides instructions for submitting comments.

The Forest Service's predecisional objection process (36 CFR 218) provides the opportunity for you to object to the draft decision that will be released following completion of the EIS. Only those who submit timely and specific written comments regarding the proposed project during a public comment period established by the responsible official are eligible to file an objection (see *How to Submit Comments* below). This scoping period will be your first opportunity to comment. To establish eligibility to object, comments must be submitted during the 30-day period beginning when the Notice of Intent to prepare an EIS is published in the *Federal Register* or during a subsequent designated opportunity to comment.

Our acceptance of Snow King's master development plan does not pre-dispose the agency to final approval of this project. I will decide whether to authorize any or all of the proposed elements, and with what conditions, based on analysis of the environmental effects and consistency with the 1990 Bridger-Teton National Forest Land and Resource Management Plan (Forest Plan) and other relevant laws, policy, and regulations. My decision will be documented in a Record of Decision. If my decision is to authorize Snow King's proposed project, in whole or in part, I would modify their existing special use permit.

As part of the Forest Service's predecisional objection process (36 CFR 218), I will issue a draft EIS for public comment, then a final EIS with a draft of the Record of Decision prior to signing my decision. This will allow us to work to resolve any objections before my decision is finalized. I anticipate release of the draft EIS in winter of 2019, a final EIS and draft decision in late summer of 2019, and a signed decision in fall of 2019.

PURPOSE AND NEED FOR ACTION:

In addition to the foundational direction provided in the Forest Plan, two emerging developments in the mountain resort industry underlie the purpose and need for the proposed action. First, extensive customer surveys conducted by the ski industry indicate that visitors are increasingly seeking a more diverse range of recreational activities, particularly for families, that includes year-round opportunities and activities that are more adventurous. The Forest Service response to this trend includes our 2012 introduction of the *Framework for Sustainable Recreation*, which sets goals for providing a diverse array of recreational opportunities aimed at connecting people with the outdoors and promoting healthy lifestyles, in partnership with other public and private recreation providers.

Second, passage of the *Ski Area Recreational Opportunity Enhancement Act of 2011* provides direction on the types of summer activities the Forest Service should consider authorizing to round out the range of opportunities provided to the public at permitted mountain resorts.

Specific to the Bridger Teton National Forest, the Forest Plan provides direction for the Forest to contribute to community prosperity and provide high-quality developed recreation facilities to serve Forest visitors (Goal 1.1 and Goal 2.2 pp. 112–114). Forest Plan Objective 1.1(f) is to "Provide areas for alpine skiing and commercial ski and snowmobile operations." Objective 2.2(a) is to "Retain, improve and add developed sites" and Objective 2.2(b) is to "Design facilities for people of all ages and abilities."

Reflecting these considerations, the purposes of the proposed Snow King Mountain Resort On-mountain Improvements Project are to:

- Maintain and improve the winter sport infrastructure on National Forest System lands at Snow King,
- Provide new and innovative forms of year-round outdoor recreation for residents and visitors to Jackson Hole, using the existing resort infrastructure as the hub, and
- Capitalize on the partnership between the Bridger-Teton and Snow King to connect visitors with the natural environment and support the quality of life and the economy of the local community.

The needs for action include:

- Improve and increase beginner and intermediate ski terrain, lifts, and facilities to serve as the primary ski resort in Jackson Hole to introduce and recruit new skiers to the sport.
- Expand snowmaking on the mountain to enable an early November opening for ski race training, provide coverage to the upper mountain, and aid in fire prevention.
- Introduce high-quality guest service facilities to attract and retain local and destination skiers, serve as an event venue, and provide an outdoor education center for Jackson residents and visitors.

- Provide access to a wide range of year-round activities catering to a variety of visitors passing through the Town of Jackson.

PROPOSED ACTION:

Snow King's proposed action includes the following elements to address the purpose and need. Each element and its rationale are described in more detail below and shown on the attached maps. A description of the proposed action is also available at <http://www.fs.usda.gov/project/?project=54201>.

- A new ski school/teaching center on the ridgeline west of the Snow King summit.
- Development of skiing in the natural bowl on the back side, south of the Snow King summit. This southernmost portion of the current special use permit area is suitable for development of low-intermediate and intermediate level ski terrain, complementing the summit teaching center.
- A 67-acre permit boundary adjustment on the front side, east of the existing permit area, to accommodate part of a summit access road/novice skiway, intermediate-level terrain lower on the slope (including groomed runs and tree and glade skiing), and a novice route down from Rafferty lift (via the access road/novice skiway).
- An 89-acre permit boundary adjustment on the front side west of the existing permit area to accommodate a summit teaching center, another part of the summit access road/novice skiway, and expert-level tree and glade skiing.
- New ski terrain totaling about 97.5 acres (groomed runs and teaching terrain).
- Upgrading the existing Summit lift to a gondola, and installation of one new chair lift, two teaching area conveyors, and one surface lift.
- On-mountain facilities (the summit restaurant/guest services building and ski patrol facility, a temporary ski patrol building at the top of Cougar, an observatory and planetarium at the summit, a wedding venue west of the summit building, and a year-round yurt camp at the southern point of the permit area).
- 147.1 acres of added snowmaking (with few exceptions, all existing and proposed runs).
- Improved and expanded lighting for night skiing.
- Front-side mountain bike trails and a back-side mountain bike zone.
- Hiking trails between the summit and the west base, west of Exhibition run.
- A zip line from the summit to the west base area, paralleling the Summit lift.

BOUNDARY ADJUSTMENTS

Snow King proposes adjustments to both their operating boundary and their special use permit boundary. The existing boundary includes 142.5 acres south of the Snow King ridgeline. The proposed action would expand winter and summer operations, including lifts, ski runs, and a mountain bike park (see details below), into to this currently permitted area.

The permit boundary adjustments would resolve the current lack of terrain for beginner, novice, and low intermediate skiers. Snow King currently offers 17.1 acres in these three categories, and as detailed below this proposal would add 37.7 acres. Attracting, accommodating, and advancing beginning skiers is critical not only to Snow King but also to the community. Local ski school programs, the Jackson Ski and Snowboard Club, and the Doug Coombs Foundation's effort to involve underprivileged children in mountain recreation would not be feasible without Snow

King, but they remain severely limited by this lack of low-ability-level terrain. To meet Snow King's desire in sustaining these programs and the desire to meet public recreational needs, a quality teaching center and appropriate terrain to support efficient, step-wise skier progression are essential.

From a planning standpoint, topography and past development preclude development of these terrain types within the existing operational boundary. Based on thorough analysis, development of terrain along the ridgeline west of the Snow King summit and on the back side is the only feasible option. The base area is already fully developed, and other than the ridgeline and back side, appropriate, low-angle terrain does not exist within or adjacent to the current permit boundary.

Development of the summit and back-side terrain would require, at a minimum, a beginner-friendly and downloadable lift accessing the summit, a skier-service and ski patrol building on the summit, an access road to build and maintain summit facilities, and a safe, "easy way down" to the base area in the event of lift failure.

As discussed in more detail below, the proposed teaching area and associated infrastructure would require new special use permit terrain both east and west of their existing front-side operations. Those additions, in turn, set the stage for other improvements not directly associated with the teaching center that are included in the proposed action and discussed below.

The eastern permit boundary adjustment would add approximately 67 acres. In addition to accommodating a segment of the required summit access road/novice skiway, this area would provide three new short intermediate runs, intermediate-level glade skiing between these runs, and a novice route down from the top of Rafferty lift via the summit access road/skiway.

The western boundary adjustment would add approximately 89 acres to Snow King's permit area, for a total adjustment of 156 acres. In addition to allowing development of the critical teaching center on the ridge, it would accommodate another segment of the summit access road/skiway. Glading would open the forested area between the westernmost access road/skiway switchbacks to expert tree skiing.

Snow King visitors increasingly venture into this currently unpatrolled and unmaintained western area. Including this area in the permit would allow Snow King to control and patrol it, making it safer for guests of Snow King and the Bridger-Teton. Together, these proposed boundary adjustments would expand the permit area from 338 to 495 acres.

TERRAIN DEVELOPMENT

Ski run development within the expanded ski area boundary (i.e., current and adjusted permit boundary and private land) would add the following acreage by ability level:

- Beginner – 3.9 acres
- Novice – 29.7 acres
- Low Intermediate – 4.1 acres
- Intermediate – 25.2 acres

- Advanced – 16.2 acres
- Expert – 18.4 acres

These new runs would total 97.5 acres. They would be cleared of trees and tall shrubs then graded to remove terrain irregularities and allow winter grooming. These additions would bring Snow King's total terrain distribution to slightly higher than the industry standard for beginner and novice terrain (6 and 25 percent, respectively, compared to industry standards of 5 and 15 percent), less for low intermediate and intermediate terrain (14 and 29 percent, respectively, compared to 25 and 35), about even for advanced terrain (13 compared to 15 percent), and higher than the standard for expert terrain (13 percent compared to 5).

Tree removal (both stands and individual trees) for safety, recreational, and forest health purposes would open new terrain to tree and glade skiing off the groomed runs. By reducing fuels, tree removal would also help reduce the spread of catastrophic wildfires at wildland/urban interface. Proposed terrain development is described in more detail below.

Teaching Center Terrain

Snow King has a deficit in beginner and novice terrain, and dedicated teaching terrain is insufficient. Currently, lower ability level skiers are limited to a small amount of suitable terrain around the base area, mostly on private land. This restricts Snow King's capability to introduce and recruit new skiers to the sport. The inability to visit Snow King's summit also limits beginner skiers' recreational experience and their exposure to National Forest System lands visible and accessible from the summit.

Development of the summit teaching center would add 3.9 acres of beginner terrain (Figure 1, Runs Lift-B and Lift-C) on the ridge, immediately west of the gondola terminal and summit building. Once beginners had the basic ability to move on their skis, they would have ready access to 29.7 acres of novice terrain from the summit. This includes Runs 16 and 23 on the back side and Runs 14 and 6, the access road/skiway providing an easy way down from the summit to the base area.

This terrain combined with gondola access and the proposed conveyor carpets (discussed below under Lifts), and with the nearby summit building providing guest services and housing the ski school (discussed below under Summit Building), would vastly improve the experience Snow King provides to beginner and novice skiers. The proposed development would benefit the learning progression and the instructors' teaching abilities, would maximize new skiers' recreational access and exposure to National Forest System resources, and would bolster visitors' connection to their public lands. Developing teaching terrain at the summit would extend the season for beginner and novice skiers and would keep them from dealing with ski soft and variable snow conditions at lower elevations late in the ski season. The proposed teaching terrain is effectively separated from higher ability level terrain, avoiding the potential problems of mixing skiers of differing ability levels.

Ski Runs

The next step is low intermediate terrain, and Runs 4, 5, and 7 would provide 4.1 addition acres in the eastern adjustment area, accessed from the summit or the top of Rafferty lift via the access road/skiway. About 25.2 acres of intermediate terrain would be developed, primarily in the back-side bowl (Runs 18, 19, 20, and 22). This would add to the terrain progression available from the summit learning area.

New advanced terrain would total about 16.2 acres, comprising Runs 17, 21, and 24 on the back side and Runs 3 and 8–13 on the front side between the summit ridge and proposed skiways accessing the base area.

A small amount of clearing (less than 0.1 acres) would take place on the uphill margin of the existing Old Man's Flats run.

Clearing and grading of 2.7 acres in four patches in the Summit pod would improve skier circulation and allow intermediate/advanced skiers access to portions of the Bear Cat, Bear Cat Glades, and Exhibition expert runs.

Gladed Ski Terrain and Forest Health Maintenance

Two factors converge in regard to use and management of forested portions of Snow King's special use permit area. First, the northern exposure of the front side and extensive forest cover result in excellent opportunities to develop intermediate-level to expert-level tree and glade skiing. This type of off-piste skiing is growing rapidly in popularity, and the proposed permit area adjustment, upgrade of the Summit lift, and development of back-side infrastructure create the potential to respond to that demand.

Second, maintaining a desirable vegetation mix and character within the permit area, consistent with preserving or enhancing recreational opportunities and experiences, is a Bridger-Teton management objective. To pursue that objective, Snow King worked with the Bridger-Teton to develop the 2015 *Snow King Mountain Resort Vegetation Management Plan* (Vegetation Management Plan). The plan's objectives specifically include development of increased tree and glade skiing, as well as tree removal to reduce hazard to visitors, reduce disease and pathogens, and reduce fire risk by breaking up fuel continuity.

Together, these factors set the stage for creation of glades in all forested areas within the permit boundary, particularly where skier access is practical and where forest health conditions indicate that active management action is required. This proposal includes glading on the back side (18.0 acres) and the east and west expansion areas on the front side (14.4 and 3.6 acres, respectively).

Glading prescriptions would be developed in conjunction with the Bridger-Teton and included in annual summer operations plans subject to Bridger-Teton approval prior to any additional glading. Glading prescriptions are discussed in the Vegetation Management Plan, and the general goal for gladed terrain is a spacing of 15 to 18 feet between trees. In many cases, this may not require much tree removal, but it would certainly involve brushing and limbing, as well as removal of any diseased or hazard trees.

Grading Existing Trails

In addition to the grading and leveling required for the development of the new runs, some grading of existing runs is needed to enhance ski race training lanes and decrease snowmaking requirements. The grading would occur on a total of 5.5 acres in nine areas:

- The top of Flying Squirrel would be graded to remove a prominent knob that impedes skier flow. This would involve 1.0 acres.
- The area between Grizzly and Kelly's Alley, where Karen's Way is located, would be regraded to eliminate the road and improve skier flow, involving 0.9 acres.
- An area at the top of the Lower Grizzly run would be regraded to improve the transition below a service road, involving 0.7 acres.
- Two areas would be regraded on the Old Man's Flats run. Material would be cut from the lower area and used to fill the upper area. This would involve 1.1 acres.
- A 0.9-acre area between the Lower Elk and Bison runs would be regraded to fill erosional depressions.
- Three areas near the confluence the Bison and Old Man's Flats runs would be regraded to remove a high spot and smooth the transition near a summer trail. This would involve a total of 0.9 acres, including 0.6 acres on National Forest System land.

SUMMIT ACCESS ROAD/NOVICE SKIWAY

Proposed development on the summit would require an access road for construction, operations, maintenance, and emergency services. As discussed above, a novice skiway from the summit to the base is essential to get beginner skiers from the summit to the base area in the event of a lift failure. This element of the proposal would meet both needs. In addition, it would provide an easy way down from the top of Rafferty lift, which does not currently exist.

As demonstrated in the master development plan, options considered during the planning process attempted to keep the access road/skiway within the existing permit area or in either the eastern or western permit boundary adjustment areas. However, the best solution to providing appropriate grades for both construction access and a novice skiway, and to minimize the amount of ground disturbance to achieve these goals, is the current proposed alignment.

The proposed alignment follows the gentle grades down the ridge west from the summit to a point near the western boundary of the adjusted permit area. From there it turns eastward, traversing across the front side of the mountain in one continuous span to the top of the Rafferty lift (Run 14), then continues on to near the eastern boundary of the adjusted permit area (Run 6). At that point, it would turn back to the northwest to tie into the existing road and run network near the northern boundary of the current permit area. This section would be bench cut to achieve a running surface width of 16 feet. Cut and fill areas would widen the area of disturbance to an average of about 90 feet.

This alignment significantly improves on-mountain safety and circulation, and creates minimal impact in terms of disturbance area, visual effects, and impacts on existing ski terrain, since it simply crosses the face without any switchbacks within the current permit boundary.

Several existing mountain access roads would be unnecessary once this access road/skiway was complete. These would be abandoned and restored.

LIFTS

Summit Gondola

As discussed above, a beginner-friendly and downloadable lift access to the summit is a requirement for developing the new teaching area. An upgraded lift would also help serve the added front-side ski terrain and provide summit access for non-skiing winter and summer activities (e.g., dining and events at the proposed summit building and proposed summer recreation and educational activities, including mountain biking). The top terminal would be incorporated into the summit building described below.

The Summit lift would be upgraded to a 1,500 person-per-hour (pph) gondola, which would: provide two-way summit access for beginner skiers and pedestrians year-round, including evenings; improve overall ski terrain access; and reduce waiting time in the lift line. With the installation of the gondola, the bottom terminal of the existing Summit lift would be removed, as would the pumphouse adjacent to it. The new lift would extend about 200 feet farther downhill to improve access to the terminal.

Lift A

As depicted on Figure 1, Lift A would service novice, intermediate, and advanced terrain on the back side. This top-drive, fixed-grip, four-person chairlift would have a slope length of approximately 3,015 feet and a capacity of 1,800 pph. From the top terminal, skiers would have access to one novice run, four intermediate runs, three advanced runs, and six expert runs. Utilities would be provided via connections from the summit building. There is existing road access to the bottom terminal. Some maintenance work on the road may be necessary.

Teaching Center Lifts (Lifts B and C)

Two conveyor carpets (Lift B and Lift C) at the summit would serve the new beginner terrain on the ridge west of the summit building. Lift B would be 363 feet in length and Lift C would be 506 feet in length. Each would have a capacity of 600 pph. These lifts would be located in close proximity to the proposed summit building. Power would be extended from the summit building.

Surface Tow D

Lift D would be a surface tow (e.g., a platter or T-bar type) to take skiers from the Lift A pod back to the summit building. Following Run 23, it would be 679 feet long, with a capacity of 300 pph. Power would come from the summit building.

BUILDINGS

Summit Building

Guest services (e.g., food/beverage service, restrooms, and basic retail sales), ski patrol functions, and ski school functions are proposed on the summit to support development of a quality learning area, and gondola access to the site would open a range of year-round recreational possibilities. The summit building is proposed as a state-of-the-art, LEED-certified, on-mountain resort facility to meet the changing desires and expectations of Snow King, community, and regional markets.

This facility would provide multiple functions, including: gondola terminal, gondola cabin storage, ski school, food service (dining/cafeteria/bar/lounge), restrooms, planetarium, ski patrol (headquarters, patient assessment space, warming area, and limited equipment storage), employee space/storage, and ticketing for summer activities. These functions are currently not provided on-mountain, and the proposed facility would take Snow King to a new level in terms of guest services and experience. To include all of these functions, the summit building would be 20,000 – 25,000 square feet in size. It would be a single story and not on the skyline, and it would be designed and built in accordance with the Forest Service's *Built Environment Image Guide* and its stipulations for the Rocky Mountain Province.

This development would also require a septic line to the summit area, which would be collocated with the buried snowmaking line running up Exhibition run. Snow King currently has water and power connections to the summit.

Observatory

An observatory building approximately 500 square feet in size would be located south of the summit building. It would be used year round for stargazing, research, and educational purposes.

Cougar Ski Patrol Facility

Until the new ski patrol facilities in the summit building were completed, a small, temporary, pre-built, pull-on structure would be installed at the top of the Cougar lift as a base for the ski patrol operations during night skiing. This would allow the patrol to station people at the top of the lift for rapid response when only the lower portion on the mountain was open. Some leveling may be done, but no foundation would be necessary. Power would come from the top of Cougar lift. It would be designed and built consistent with the *Built Environment Image Guide* stipulations and would be removed once the summit building was complete.

Saddleback Yurt Camp

A new Americans with Disabilities Act (ADA) compliant yurt camp would be constructed at the far south end of the existing permit boundary. A 1-mile ADA compliant trail connecting to the summit of Snow King would access this facility. The yurt camp would consist of approximately six yurts for sleeping and three multi-use cooking/dining/gathering yurts. These yurts would range in size from 20 to 30 feet in diameter with additional deck space. This year-round camp would serve backcountry skiers, hikers, bikers, and a wide range of groups. In winter, guided

backcountry skiing, snow safety courses, and snowshoe hikes would be offered out of the yurt camp in conjunction with the Snow King Mountain Sports School. This offering of a wilderness-like experience only a short walk/ski from civilization would attract a wide range of visitors seeking a unique activity during their visit to Jackson. This facility would be unique in the region due to the ease of access, spectacular setting in the National Forest, and number of activities offered.

Night Skiing

At present, Snow King offers night skiing on approximately 73.8 acres of night skiing on the lower two-thirds of the mountain, in the Rafferty and Cougar pods. This is primarily intermediate ability-level terrain, with some advanced and beginner terrain. Until recently, approximately 50 lights were mounted on a variety of structures including trees, lift towers, light poles, and buildings. Coverage was limited, and the technology was obsolete. This was a particular impediment to race training, which occurs in the evening after school hours. Good lighting is an important safety factor in race training. A general system upgrade was implemented in 2015 and remains underway, replacing lighting fixtures with more efficient models designed to increase lighting of the snow surface but reduce light pollution (glare and sky glow).

Under this proposal, Snow King would expand lighting coverage using this upgraded technology (see Figure 2). Additional lighting would be provided on the racing lanes in the Cougar pod, and lighting would be extended to the top of the Rafferty pod (Flying Squirrel and Moose runs), the top of Upper Elk run, and the proposed access road/skiway. Overall, this proposal would increase system coverage by 27.3 acres across all skier ability levels to meet demand for this unique experience and provide for safe and effective race training.

SNOWMAKING

Snow King's snowmaking system covers approximately 90.4 acres of the ski area, in the Rafferty and Cougar pods, as well as to the top of Elk run. This system is served by two 1,000-gallon-per-minute (GPM) pumps in the main pump house and is fed by domestic water provided by the Town of Jackson.

To provide more consistent, season-long snow coverage over a wider area, Snow King proposes to expand coverage on both existing and proposed runs (see Figure 3). Coverage would be added on all existing front-side runs except East and West S Chutes, and all proposed front-side and back-side runs, except Run 9. This would result in approximately 147.1 acres of additional snowmaking coverage.

Water lines would be installed on the upwind side of covered runs, in excavated trenches approximately 4 feet deep. Snowmaking hydrants would be plumbed in adjacent to these main snowmaking lines. Snowmaking guns or hose lines would be attached to these hydrants. All water would continue to be supplied by the Town of Jackson.

SUMMER ACTIVITIES

The Snow King master development plan documents the “activity zone” analysis completed as part of their planning process, in compliance with the Ski Area Recreational Opportunity Enhancement Act of 2011. The following proposed summer activities would not change or compromise existing winter snow sports, nor exceed the level of development required for snow sports, but are designed to integrate with and supplement the primary purposes of the ski area. Hiking and biking trails would generally not be collocated with ski runs but may intersect them. Year-round use of the summit building, observatory, and other support facilities would complement these activities. See Figure 4.

Zip Lines

Expanding on current summer operations, Snow King proposes a zip line from the proposed summit building to the base area, paralleling the Summit lift. This project is consistent with the 2013 Jackson Town Council amendment to Snow King’s land use lease to include “additional recreational uses related to ski areas such as zip lines, mountain bike trails and other outdoor amenities.” This would be an attractive amenity, as guests would quickly descend approximately 1,555 vertical feet, over a distance 3,900 linear feet, at a 48 percent grade to the base area. Guests would ride the new Summit gondola to reach the summit station of the proposed zip line and terminate at the west base area.

Mountain Bike Trails

Lift-served downhill mountain biking is arguably the fastest growing summer activity at mountain resorts in the U.S. and abroad. Not surprisingly, demand for this activity is particularly high in the Jackson area. To meet this demand, Snow King proposes to develop a system of lift-served trails on the front side and a more consolidated mountain bike park-type “mountain bike zone” on the back side.

The front-side trails would include an advanced and an intermediate trail angling down from near the top of the Summit lift to near the top of the Rafferty lift. These would be smooth, excavated trails with a 4-to-5-foot tread. Spurs of narrower hand-built, single-track trail with constructed terrain features would depart from the excavated trails and drop more directly down the slope. At about the elevation of the top of cougar lift, these upper-mountain trails would merge into a beginner and an intermediate-level excavated trail. These two trails would subsequently merge into a single beginner-level excavated trail crossing the toe of the slope down to the west base area.

The front-side bike trail system would total about 6.5 miles, including approximately 1.9 miles of advanced trail (all on National Forest System land), 2.6 miles of intermediate trail (2.4 miles on National Forest System land), and 2.0 miles of beginner trail (0.9 miles on National Forest System land).

On the back side, a skills park and a network of trails of differing types and ability levels would be developed within a roughly 110-acre mountain bike zone. This area would be accessed via the Summit lift, and uphill transit within it would be provided by the proposed Lift A.

These trail designs are conceptual. The exact locations of trails may change when developed to achieve desired grade and location with respect to existing, site-specific, terrain features.

Hiking Trails

Due to Snow King's close proximity to a fairly populated, residential area of the Town of Jackson, Snow King has observed a developing interest by local residents for an uphill hiking trail. To accommodate this interest on National Forest System lands, Snow King proposes to improve the Stairway Trail, including portions in the western permit boundary adjustment area. A direct ascent route to the summit would be created in the trees along Exhibition run to eliminate erosion problems associated with community trails that have been created in this corridor. This 0.6-mile trail (0.4 miles on National Forest System land) would cater to the many trails users who demand the toughest or most direct workout ascending the mountain. In the winter months, this route would serve as the designated direct boot-pack ascent route.

In addition, a new 1.5-mile uphill hiking trail would be developed just west of the Stairway Trail in the Bear Cat glades area, extending into the western permit expansion area near the top. With an approximate grade of 13 percent, it would create an improved experience for hikers seeking to ascend the mountain via a less direct route. This trail would route trail users off the face of the mountain where service roads provide access to the summit and create potential safety concerns. In winter months, this trail would serve as the primary designated uphill ski route. Taking uphill skiers off the main ski runs in winter would reduce conflicts between uphill and downhill skier traffic, as well as limit the interaction between uphill skiers and grooming operations at night.

Wedding Venue

In conjunction with the summit building, a wedding venue is planned to be constructed a few hundred feet west of the new building. This would be an in-ground facility, constructed with stone benches/tiers in a semi-circle around a raised platform.

IMPLEMENTATION:

Construction would begin in the construction season following authorization, anticipated to be summer of 2020. Completion of the proposed action is projected by October 2025.

HOW TO SUBMIT COMMENTS:

While comments will be accepted any time during the process, to be most useful in the preparation of the EIS and to establish eligibility to file an objection, comments must be provided during a designated opportunity for public comment. This scoping period, starting with the date of publication of the Notice of Intent in the Federal Register and continuing for 30 days, is the first designated opportunity to comment.

Comments should clearly articulate the reviewer's concerns about potential environmental impacts of this project and any alternatives or design features that might reduce those impacts. We will consider references provided by commenters if the cited articles are submitted with the

comment letter, and if the letter identifies the relevance of the findings to specific actions and effects of this particular project.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record and available for public inspection. Comments submitted anonymously will be accepted and considered; however, anonymous comments will not allow the respondent to have standing in subsequent administrative or judicial reviews.

Individuals and organizations wishing to be eligible to object must meet the information requirements of 36 CFR 218 Subparts A and B. It is the responsibility of all individuals and organizations to ensure that their comments are received in a timely manner. Only those who submit timely and specific written comments regarding the proposed action during a public comment period established by the responsible official are eligible to file an objection under 36 CFR 218. Specific written comments, as defined by 36 CFR 218.2, should be within the scope of the proposed action, have a direct relationship to the proposed action, and must include supporting reasons for the responsible official to consider.

Written, facsimile, hand-delivered, and electronic comments concerning this action will be accepted for 30 calendar days following the publication of the Notice of Intent in the *Federal Register*, per the provisions of 36 CFR 218. The publication date in the *Federal Register* is the exclusive means for calculating the comment period for this analysis. Those wishing to comment should not rely upon dates or timeframe information provided by any other source.

In cases where no identifiable name is attached to a comment, a verification of identity will be required for objection eligibility. If using an electronic message, a scanned signature is one way to provide verification. For objection eligibility each individual or representative from each entity submitting timely and specific written comments regarding the proposed project must either sign the comments or verify identity upon request.

Please address any form of comments as attention: Snow King On-mountain Improvements Project. Electronic comments must be submitted in rich text format (.rtf) or Word (.doc) to comments-intermtn-bridger-teton-jackson@fs.fed.us. Written comments must be submitted to: Bridger-Teton National Forest - Jackson Ranger District, P.O. Box 1689, Jackson, WY 83001 – attention District Ranger Mary Moore. Comments may be hand-delivered to 340 N. Cache St. between 8:00 AM and 4:30 PM, Monday through Friday, excluding holidays.

An objection period, if required, will follow regulations found in 36 CFR 218.7. For objection eligibility (36 CFR 218.5), only those who have submitted timely, specific written comments during a designated opportunity for public comment may file an objection. Issues raised in future objections must be based on previously submitted specific written comments regarding the proposed project and attributed to the objector, unless the issue is based on new information that arose after a designated opportunity to comment (36 CFR 218.8(c)).

Additional information on this project is available on the project webpage: <http://www.fs.usda.gov/project/?project=54201> . If you would like more information or have questions relating to this project, please contact Mary Moore, Jackson District Ranger, by email at marvmoore@fs.fed.us, or by phone at 307-739-5410.

Please feel free to pass this letter on to others you think may have an interest or concern with this project.

Sincerely,

PATRICIA M O'CONNOR
Forest Supervisor

**Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018**

GOAL OF THE STAKEHOLDER PROCESS

The goal of the Snow King Mountain Stakeholder Group process was for a group of 16 members of the community to work together to come up with multiple scenarios for the future of Snow King Mountain that balance community interests. The group included representatives from Snow King and the Town of Jackson staff sitting down with community members with diverse preferences and experiences regarding Snow King—some looking at the issue through an environmental lens, some through a business lens, some as Snow King users and user groups, and some as neighbors, but all with the needs and future of the community at heart (membership list attached).

The Stakeholder Group met six times between March and May, working to understand the community interests, identifying the issues and factors at play on the mountain and at the base, brainstorming and exploring different options and ideas, and, finally, agreeing on four different scenarios that represent a reasonable range of alternatives for the future of the Snow King Mountain Resort. These four vision scenarios are summarized in the accompanying table. The visions represent a substantial commitment of time and effort by the Stakeholder Group and a careful deliberation about how best to balance the community's interests and ideas.

PURPOSE OF THIS DOCUMENT

The four scenarios that emerged from the stakeholder dialogue are captured in a separate summary table. The purpose of this document is to provide additional information about some aspects of the scenarios and, perhaps more importantly, about the nature of the Stakeholder Group's discussions. The summary table is the outcome and output of the stakeholder process, as captured by Town staff and the facilitator. ***This report is intended to support that document and enhance shared understanding of the group's work, but it is not a group work product.*** It was prepared by staff and the facilitator, and the Stakeholder Group was invited to review it and provide edits, but given the short turnaround required and the lack of in-person discussion about the summary, it should be viewed as a staff and contractor document rather than a group report.

COMMUNITY INTERESTS

- ✓ Conservation of wildlife habitat and wildlands
- ✓ Economic viability of Snow King Mountain recreation and resort area
- ✓ Diversity of year-round recreational opportunities for diverse user groups
- ✓ Community accessibility and affordability
- ✓ Preservation of the cultural, environmental, and historical character of Jackson
- ✓ Prioritization of community safety
- ✓ Availability of high-quality facilities
- ✓ Minimized impacts to the surrounding areas.
- ✓ Consideration of impacts to infrastructure and services, both positive and negative
- ✓ Balanced impacts of development and tourism on the community, both positive and negative, that can serve as a model for others
- ✓ Consideration of community-wide educational opportunities
- ✓ Consideration for holding events
- ✓ Broadened appeal of the offerings and amenities at Snow King Mountain
- ✓ Clear and concise guiding documents to clarify rights, responsibilities, and accountability for all parties involved in the future of Snow King Mountain
- ✓ Maintained and enhanced world-class training and facilities
- ✓ Prioritization of environmental sustainability

**Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018**

ROLE OF THE COMMUNITY IN THE PROCESS

The process included two community meetings to allow the Stakeholder Group to learn about the broader community's interests and visions. At the first community meeting, participants were invited to share their interests on the future of Snow King—these are the underlying motivations and “why’s” they have for the preferences they have. The Stakeholder Group refined the list of 88 interests from the community meeting down to a list of 16 interests that then served as a touchstone for the remainder of the process. At the second community meeting, the Stakeholder Group summarized the options they had identified for all the issues at play in Snow King’s future, and then invited community members to build their own scenarios. The Stakeholder Group received 288 completed community vision packages, and then used those to inform their final discussion on which and how many scenarios to share with Town Council and Snow King.

PRIMARY STEPS IN THE PROCESS

The first Stakeholder Group meeting occurred the day after the first community meeting. At this meeting, the group developed their operating protocols (attached) and discussed the community interests (see above). The remaining meetings involved the follow steps and actions:

- Development of a preliminary vision for the base
- Discussion of options for the primary elements of the area (front of the mountain trails, zip line, summit, back of the mountain, boundary expansion and road, east portal and other SRKMA properties, etc.)
- Delineation of future responsibilities and commitments for Snow King, the Snow King Resort Management Association (SKRMA), and the Town
- Clarification of the options to share with the community to learn how they would package the options to meet the identified interests
- Development of four final scenarios to submit to Town Council and Snow King for consideration

KEY ISSUES IN THE DISCUSSION

The Stakeholder Group worked hard to be creative and find new paths forward, while also staying anchored in the best interests of the community. There were several key issues that the group discussed at great length, working to understand one another’s perspective and to find options for the future that accommodated as many of the community interests as possible.

KEY ISSUES DISCUSSED

- ✓ Balancing allowing the gondola to land on Town property with developing new community benefits at the base
- ✓ Ensuring additional community benefits, such as increased housing, improvements to parking and traffic, and community access to summit amenities in exchange for development opportunities for Snow King
- ✓ Improving traffic flows and parking for all uses, without pushing problems off of main roads and arterials and into adjacent neighborhoods
- ✓ Balancing the environmental impacts of putting in a new road with the potential gains in safety for staff and visitors to the summit
- ✓ Maintaining the character of the Town while providing growth and development opportunities for Snow King
- ✓ Ensuring that the roles and responsibilities are clear for Snow King, SKRMA, and the Town into the future

**Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018**

Gondola Landing and a Vision for the Base

The Stakeholder Group discussed Snow King's proposal to install a new gondola in place of the existing Summit Lift and to land the new gondola on Town of Jackson property. The group acknowledged that landing a new gondola on Town property would represent a substantial contribution from the community to Snow King, particularly since the land that would be used is currently a parking lot used to access the community park. However, the group also noted that this potential contribution from the community represents a substantial opportunity for the Town to negotiate some exciting amenities for the residents of Jackson in exchange for use of Town property.

While not all members of the group agreed on what the best package of "gives" and "gets" should be to ensure that the Town and residents receive an appropriate amount of community benefit for landing the gondola on Town property, there was convergence in the group around a vision to maximize gains for all by thinking creatively about the base. Toward this end, several members of the Stakeholder Group met between meetings to develop ***a vision for the base of Snow King that could substantially improve the flow of activities on the mountain and facilitate Snow King's delivery of mountain recreation, while also bringing exciting new recreational opportunities to the area for residents.*** The underlying idea behind the vision is that Snow King, the Town, and the residents would all gain from the vision, adding value for everyone through creative thinking and thoughtful development.

The new vision for the base included the following elements:

- Mutual planning, development, and creation of a world-class west base area, which would be ***the largest, most accessible and contiguous (green/grass and white/snow) public/recreational space possible***, designed for optimal functionality for multiple uses (both public and resort) in all seasons.
- ***Removal and replacement of the Summit Lift with a gondola.***
- Careful siting of the gondola landing on Town property ***to maximize contiguous green and white space on the property.***
- Development of ***a world-class park, event center, and youth sports facility*** accommodating public and private events and competitions, a community center, spectator hospitality, resort amenities, and headquarters for the Jackson Hole Ski and Snowboard Club, Doug Coombs Foundation, Jackson Hole Youth Hockey, Jackson Hole Moose Hockey, Jackson Hole Skating Club, the Jackson Hole High School Ski Team, the Jackson Hole Chapter of the Girls Scouts, and/or a year-round youth/teen center.
- ***Consideration of a variety of community, athletic, and recreational uses at the new sports facility***, including an additional ice rink, a climbing gym, meeting rooms, office space, study space or a branch library, among other things.
- ***Creation of an expanded and enhanced outdoor park space*** designed to accommodate multiple uses including but not limited to: baseball/kickball, markets and fairs, concerts, general public use, youth sports and winter sports dryland, and community events.
- ***Establishment of shared funding / expense and operating agreements***, association, or similar organizational structure to help create this vision and cover ongoing

**Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018**

operations and maintenance of base area facilities (e.g., plowing, parking, janitorial services for shared buildings) and community benefits.

The idea behind this vision for the base is that it would substantially improve the recreational opportunities for the community by increasing the contiguous community space at the base to allow for more outdoor uses and by developing a community mountain and event center for new and expanded indoor uses. There was strong support among stakeholders about the need for a clear delineation of responsibilities between the Town, Snow King Mountain Resort, and Snow King Resort Management Association (SKRMA), in order to improve maintenance of roads and facilities to improve the user experience and increase safety.

It is important to note that the Stakeholder Group talked at length about the many members of the community who indicated a preference for *not* landing the gondola on Town property in their vision packages at the community meeting. The group members acknowledged and carefully considered this preference. Upon further deliberation, many in the group ultimately agreed the vision at the base that included landing the gondola on Town property held the greatest promise for delivering substantial community benefit to Town residents while also facilitating operational efficiencies for Snow King.

Community Benefits Now and for the Future

Members of the Stakeholder Group stressed the importance of developing vision packages for Snow King that promised a strong return to the local community for their continued and increased support of Snow King.

Community benefits included more recreational opportunities at the base (see above), as well as a new building at the summit of Snow King that would be open and welcoming to visitors and the community alike. The new summit building would include a restaurant open to the community, community space, a telescope and planetarium, and other amenities. The summit area would include picnic tables, a weather station, and easy access to the glorious views that make Jackson special. The summit would be served by a new gondola, and there would be improvements to existing ski terrain for the benefit of visitors and residents alike. These would be available year-round—free for hikers in the summer and for a lift-ticket fee in the winter (with advance purchase, season pass, and daily pass options).

COMMUNITY BENEFITS INCLUDED IN STAKEHOLDER VISION SCENARIOS

- ✓ Reconfiguration and expansion of contiguous green/snow space at Phil Baux Park
- ✓ New event space at Phil Baux Park
- ✓ A new summit building with access for the community, including a restaurant, a telescope/planetarium, and community space
- ✓ New picnic areas at the summit and yurts on the backside of the mountain
- ✓ Improved and in some cases expanded ski terrain on the mountain
- ✓ Expansion and improvement of the existing ice rink
- ✓ Creation of a new community mountain sports center
- ✓ Improved flow for drop-offs and through traffic at the base
- ✓ Increased and improved parking at the existing ice rink
- ✓ New housing for Snow King employees provided on Snow King property to alleviate housing pressures elsewhere in the community
- ✓ Clear commitments from Snow King and SKRMA for future management, financial investment, and maintenance of amenities and infrastructure

**Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018**

Other recreational benefits that this vision included for the community include expansion of the existing ice rink and the creation of a new world-class community mountain sports center (described above). These developments would expand the indoor sports recreation opportunities available in Jackson, providing more ice for hockey and figure skating, a climbing wall, and other fitness and sports opportunity. There would also be improved space to support management and growth of community sports and community groups like Jackson Hole Ski and Snowboard Club, Doug Coombs Foundation, Jackson Hole Youth Hockey, Jackson Hole Moose Hockey, Jackson Hole Skating Club, the Jackson Hole High School Ski Team, the Jackson Hole Chapter of the Girls Scouts.

The Stakeholder Group also sought benefits to the community outside of the sports and recreation spheres. They saw a lot of room for improvement in parking, traffic, and transportation at the base of Snow King. ***The group agreed on the need for a new parking, traffic, and use study for the area to assess the problems, identify the sources and patterns behind the problems, and recommend creative solutions. The group further agreed that the study should be jointly funded and implemented by Snow King, SKRMA, and the Town.*** The group acknowledged that they are not traffic engineers or otherwise experts in the field, but they also had strong preferences for alleviating parking challenges in the area and ensuring that Snow King and SKRMA invest in solutions along with the Town. Some members of the group felt strongly that the parking improvements on main streets and arterials should not have the effect of pushing parking and traffic onto side streets and into neighborhoods adjacent to Snow King and SKRMA properties. The Stakeholder Group discussed a variety of options for ways to address parking and improve the flow of traffic, but did not agree on the best strategies. The parking and traffic improvements options that gained the most traction in the group are captured in the accompanying scenario summary table.

A Discussion of Finances

Most members of the stakeholder group expressed support for maintaining the viability of Snow King into the future, although they expressed different understandings and visions for what that meant, what would be needed to accomplish it, and what the Town's role in it should be. Early on, Snow King requested that the group not delve into the financial details of the resort, suggesting that it would not be the best use of the group's limited meeting time to try to understand, debate, or seek agreement on the financial status or revenue needs for Snow King. Some members continued to believe that knowing the needs of Snow King and the relative cost and revenue projections for different elements being considered for future development would help the group make informed choices for a vision. Others stated that this line of discussion held more opportunity for disagreement and debate than it did for visioning and creative thinking. In the end, the group invested their time in visions rather than finances. However, they did discuss more broadly the need for SKRMA to contribute financially to the community benefit and recreational operations at Snow King. This was very important to some stakeholders and is reflected in the scenario table under "SKRMA commitments."

**Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018**

Balancing Hard Issues

Among the more challenging issues that the group addressed were boundary expansion, road development, and zipline. Snow King representatives had previously and in stakeholder meetings expressed the importance of these topics to the future financial viability of the ski mountain. Community members expressed a variety of perspectives on these issues in their identification of interests and in their vision packages. Members of the Stakeholder Group also expressed different opinions on each, often with different understandings or calculations of the tradeoffs and gains for the community.

The group explored several ideas and options related to gains for Snow King and for the community but did not agree on or converge on a particular outcome. Some of the options considered are listed below. These are ideas discussed and considered by the whole group, but not necessarily supported by individual members of the group. The summary scenario table demonstrates different ways that these elements could be combined with other ideas to create unique packages of benefits for Snow King and the community.

HARD ISSUES TO BALANCE

✓ ***Boundary expansion:***

- Whether to do it, how much to do it, where to do it (face of the mountain, summit)
- Concerns about environmental impacts
- Benefits for the community in terms of expanded ski terrain
- Other benefits for the community?

✓ ***Road development:***

- Potential improvements in safety, operations, and summit access
- Concerns about grade of new road, visual impacts, and environmental impacts
- Benefits for the community in terms of potential new ski terrain between switchbacks
- Other benefits for the community?

✓ ***Zipline:***

- Whether to have one
- Where to put one if there is one
- Concerns about visual impacts and impacts to the experience on the mountain and to surrounding neighbors and the cemetery
- Benefits to the community?

- Boundary expansion at the summit *could* make sense if it included an expansion of the ski terrain to create new beginner skiing opportunities in a sunnier, warmer area
- Minimal boundary expansion on the face of the mountain *could* make sense if it allowed for development of a new road to improve safety and summit access
- A new road to improve safety and access *could* make sense if skiing is allowed between the switchbacks
- *If* a zipline is going to be built, it *could* fit better with the surrounding community *if* it was located next to the Rafferty Lift and *if* use was managed to respect visitors to the cemetery. Alternatively, *if* a zipline is going to be built, it *could* fit better with the surrounding community *if* it was located adjacent to the gondola, which *could* reduce visual impacts and alleviate concerns about the cemetery.

However, there were several concerns that consistently emerged that the Stakeholder Group was unable to resolve with regard to these options. These issues are listed below. Some of the issues could be informed and/or resolved through the National Environmental Policy Act (NEPA) analysis that the US Forest Service will conduct as part of a Snow King application process. Others are matters of preference or perspective and are therefore more difficult to resolve.

Snow King Mountain Stakeholder Group
Staff and Consultant Summary of Outcomes and the Process
May 17, 2018

- The potential impacts of expanding the ski area boundary and/or building a new road on elk habitat, migration corridors, and other natural resource values on the mountain
- The engineering challenge of constructing a new road on the front of the mountain on one hand, and addressing safety and operational concerns related to accessing resort infrastructure and the summit on the other hand
- The change in the experience on the mountain and in the surrounding neighborhoods with the addition of a zipline, particularly related to noise and potential loss of a low-key atmosphere
- The potential visual impacts from a new road and/or a zipline
- The ability or lack of ability to minimize or mitigate these potential impacts
- What the appropriate package of community benefits should be in exchange for boundary expansion and/or new road development and/or a zipline

Scenario Packages and Areas of Divergence

The Stakeholder Group talked at great length about how best to balance gains and opportunities for Snow King with gains and opportunities for the community. Maintaining community character and protecting environmental and natural resource values were important variables in the equation. While there are many areas of agreement among the stakeholders that are reflected in the pages above and in common language in different boxes in the scenario summary table, different members of the group weighed those elements differently against other gains and opportunities for the community. For this reason, the Stakeholder Group encourages Town Council and Snow King to look at each scenario as a complete package without “cherry picking” the common elements and removing them from the context of the scenario packages. ***While there is general stakeholder convergence around many scenario elements, there remains divergence among the stakeholders about important aspects of the future of Snow King, including whether to have a zipline and where to put it if there is one, whether to develop a new road and where to put it if there is one, and whether, where, how much to expand the Snow King boundary. The convergence in many cases is based on compromises made in other topic areas, some of which may not be obvious to those who were not a part of the discussion. The group hopes that future negotiations, analyses, and permitting processes among and between Snow King, SRKMA, the Town, and the US Forest Service yield a balance of outcomes that allow for the continued viability of Snow King while providing community benefits and maintaining the feel of the community that makes Jackson such a desirable place to call home.***

Snow King Vision Stakeholder Group Final Vision Scenarios - May 17, 2018

WHAT'S IN THE TABLE

The following table summarizes four scenarios that the Stakeholder Group agreed represent a reasonable range of alternative visions for the future of Snow King. Each scenario should be viewed as a complete package, as each balances the interests in a unique and carefully thought-out way. Some elements discussed in the table are marked with an asterisk (*). The asterisk indicates that the same language for that element occurs in each of the four scenarios. However, this does not necessarily mean that members of the Stakeholder Group support that language or that element no matter what; each scenario includes other components to balance these elements differently. The Stakeholder Group encourages Council and the community not to infer that there is universal agreement about the elements with the asterisks and to review those elements in the broader context of each scenario as a stand-alone package of carefully considered trade-offs.

Note: The Stakeholder Group seriously and carefully considered the interests and vision packages that emerged from the two community meetings. The Stakeholder Group integrated the community's perspectives into their own deeper dive into potential futures that address all the identified interests and considerations. Early in their work together, the Stakeholder Group converged around a vision for the base of the mountain that fundamentally rethinks the base in a way that maximizes the community benefits and meets the greatest number of interests to the largest degree. The Stakeholder Group encourages Council and the community to view the vision for the base and the accompanying scenarios not through a lens of a particular interest, but through a lens of what will be best for the whole community in the long-term. Please read the accompanying summary report to learn about the Stakeholder Group's vision for the base and other elements and ideas that the group considered.

This summary document was prepared by Heather Bergman of Peak Facilitation Group and Tyler Sinclair, Director of Planning for the Town of Jackson. Due to the urgency of getting information to Council, the Stakeholder Group did not have time for a thorough, in-person review of this table as a group. Individuals suggested clarifications and edits in response to an emailed draft document; Heather and Tyler incorporated those to the best of their ability, working to remain consistent with the notes from the meeting. Any errors in this document should be attributed to the writing team, not to the stakeholders.

**Snow King Vision Stakeholder Group
Final Vision Scenarios - May 17, 2018**

ELEMENTS	SCENARIO A	SCENARIO B	SCENARIO C	SCENARIO D
Zip Line	No zip line <i>Note: A zip line could be incorporated into this scenario: a) if it was accompanied by additional community benefit provided by Snow King, and b) only if the zip line was put adjacent to the Rafferty lift.</i>	No zip line	Zip line on west side of mountain (West Portal), activity recommended to be built adjacent (on east side) of Gondola.	Zip line on east side of the mountain adjacent to the Rafferty Lift.
Boundary Expansion/Road	Expand boundary to encompass new road as proposed by Snow King Mountain but without the additional terrain proposed on the front side; this <u>does</u> allow for skiing between switchbacks.	Expand boundary to encompass new road as proposed by Snow King Mountain but without the additional terrain proposed on the front side; <u>do not</u> allow for skiing between switchbacks.	Expand boundary to encompass new road as proposed by Snow King Mountain but without the additional terrain proposed on the front side; this <u>does</u> allow for skiing between switchbacks.	No boundary expansion; new road within existing boundary, for summer operations and safety purposes, could still be used for downhill skiing in the winter. <i>Note: Consider which needs could be met by a road on the backside to inform and potentially limit size and impact of road on front side of mountain.</i>
Summit Multi-use Building*	Multi-use building that is welcoming to both visitors and locals <ul style="list-style-type: none"> • Green development • Space for community activities • Allow for community use even when events are going on • Appropriate size to accommodate needs without being too big; maximize flexibility of space while minimizing footprint • No mid-mountain lodge as previously considered in the 	Multi-use building that is welcoming to both visitors and locals <ul style="list-style-type: none"> • Green development • Space for community activities • Allow for community use even when events are going on • Appropriate size to accommodate needs without being too big; maximize flexibility of space while minimizing footprint • No mid-mountain lodge as previously considered in the 	Multi-use building that is welcoming to both visitors and locals <ul style="list-style-type: none"> • Green development • Space for community activities • Allow for community use even when events are going on • Appropriate size to accommodate needs without being too big; maximize flexibility of space while minimizing footprint • No mid-mountain lodge as previously considered in the 	Multi-use building that is welcoming to both visitors and locals <ul style="list-style-type: none"> • Green development • Space for community activities • Allow for community use even when events are going on • Appropriate size to accommodate needs without being too big; maximize flexibility of space while minimizing footprint • No mid-mountain lodge as previously considered in the
