Narrative Project Description

150 Scott Lane, Jackson, Wy 83001

The existing buildings consist of a 15,736 square foot retail space and two storage buildings that are a total of 12,385 square feet on a 1.91-acre lot in the CR-3 zone. The structure being repurposed is identified as VB construction. The existing lot consists of mixed blue spruce, aspen, cottonwood, and semi-natural planted woodland to the north of the site.

We would like to repurpose 7,935 square feet of a 15,736 square foot retail shopping center into interior accessed storage units. Access to the remodeled space will be from the west of the site along Scott Lane. There will be a total of 57 storage units of varying sizes that will be accessed from 3 egress doors all existing. Each egress door will have a key code that is given to tenants of the storage space. Each storage space will have its own master lock that is keyed for the owner of that storage space only.

We will need a minimum of 38 parking spaces, which is satisfied by the existing 42 parking spaces that will remain on the property. There are 2 ADA parking spaces required based on the 42 parking spaces provided. We will convert one of the existing regular parking spaces to an ADA parking space along with the required aisle access that will serve both ADA parking spaces.

The building consists of a CMU exterior construction. All existing windows and doors not repurposed for egress will be demoed. These demoed openings will be patched with CMU to match existing and will have zero structural implications as every opening has a CMU bond beam header. There will be minor work on the roof, for a new rooftop unit for heating and cooling purposes. Any construction needed to hoist rooftop unit will be waterproofed. This single roof top unit will provide heat and cooling to keep the space at 68 degrees year-round. The whole building (including existing retail space) will be sprinkled, and the existing retail space will be retrofitted to be sprinkled. Retrofitting the existing retail space will just be a typical commercial hung sprinkler line as needed and will be similar in the storage space. The builder truss cavity is over the permitted height and will have a dry system for fire suppression. There will be a 1-hour wall between occupancies. Signs will be posted to permit any major flammables to be stored in each unit and will follow IBC standards for flammables allowed in a Storage occupancy. Insulation in the new space will meet code. We will add extra insulation where needed in the ceiling and furr-out CMU wall on the inside with a wood stud wall with insulation to meet the R-values needed.

The project consists of the following:

Housing Mitigation Plan

updated 1/8/21

Development of a new house, hotel, or commercial space generates the need for employees. The construction workforce builds the space, the commercial workforce or residential service workforce works in the space, and first responders are needed to protect the space. Only about 27% of the employees generated by development can afford housing in the community, but the community's "community first" character goal is that 65% of employees live locally. To bridge this affordability gap, each development is required to include affordable workforce housing proportional to the employees it generates. These housing mitigation requirements are established in Division 6.3 of the Land Development Regulations. This worksheet is intended to assist in meeting the requirements for a project. However, an error in the worksheet does not amend the actual standard; if you find an error please notify the Planning Department. Fill in the highlighted cells, all the other cells will autopopulate.

Calculating the Requirement (Sec. 6.3.2 & 6.3.3)

Step 1: Location Town of Jackson

The applicable regulations vary by jurisdiction please identify the location of your project using the above dropdown options.

The required housing is based on the existing and proposed use of the site. Step 2 is to enter the existing use and Step 3 is to enter the proposed use. Section 6.3.2 of the LDRs establishes the applicability of the affordable workforce housing standards and Section 6.3.3 establishes the specifics on calculation of the requirement. Enter each use in its own row, add rows if needed. If a building has multiple units with the same use, describe each unit in its own row. (For example: if a duplex is composed of a 2,300 sf attached unit and a 1,700 sf attached unit, put each unit in its own row do not put in 4,000 sf of attached single-family.) If a unit type (e.g. apartment floor plan, or commercial tennant space) is replicated exactly multiple times, you may use the "Use Quantity" column to avoid adding multiple rows.

Step 2: Existing Development

Housing is only required for new development. Please describe the existing use of the site so that it can be credited from the housing requirement. The definition of existing use is Section 6.3.2.A.1 of the LDRs. Generally, the existing use to enter is the use with the highest housing requirement that either existed in 1995, or has been permitted since 1995. Please attach proof of existence.

Existing Use (Sec. 6.3.2.A)	Housing Requirement (Sec. 6.3.3.A)	Use Size: bedrooms	Use Size: habitable sf	Use Quantity	Housing Required
Retail	0.000216*sف	0	7935	1	1.712

Existing Workforce Housing Credit 1.712

Step 3: Proposed Development

Please describe the proposed use of the site to determine if affordable workforce housing is required as part of the development. Describe the end result of the proposed development. (For example: in the case of an addition do not enter the square footage of the addition, enter the size of the unit upon completion of the addition.)

Proposed Use	Housing Requirement (Sec. 6.3.3.A)	Use Size: bedrooms	Use Size: habitable sf	Use Quantity	Housing Required
Mini-Storage Warehouse	0.000007*sف	0	7935	1	0.052

Affordable Workforce Housing Required: 0.000 units

Fee-in-Lieu Amount: \$ -

If the amount of required affordable workforce housing is less than one unit, you may pay the above fee in-lieu of providing the required housing. If you elect to pay the fee, your Housing Mitigation Plan is complete. If the requirement is greater than one unit, or you would like to provide a unit to meet the requirement, please proceed to the [Unit Type Sheet](#).
