There will be no increase to the height of the structure nor any expansion or disturbance of the ground space involved in this project. All current steeling will remain in place and all new equipment will be installed behind the existing screen wall. AT&T is proposing the following changes as stated below. Construction is estimated to start on January 27, 2025, and be complete by March 10, 2025. All work will take place between the hours of 8 am and 5 pm.

VIA ELECTRONIC DELIVERY

RE: Request for Minor Modification to Existing Wireless Facility - Section 6409/47 CFR § 1.6100 ("6409")
Site Address: 160 Millward Street Jackson, WY 83001
AT&T Project No.: JACKSON_SQUARE RELO_IDL04511_14284658

To Whom it May Concern:

On behalf of New Cingular Wireless PCS, LLC ("AT&T") we are pleased to submit this request to modify AT&T's existing wireless communication site at Verizon's existing wireless communication site at the location referenced above, as an Eligible Facilities Request for a minor modification under Section 6409 and Federal Communications Commission ("FCC") rules.

Scope of Work

AT&T proposes the following minor modifications to this site. (Please note: all work will be performed wholly within the existing premises and utility easements, this site contains a stealth wall as concealment and the project otherwise complies with the site's prior conditions of approval.)

| <u>Component</u> | <u>Federal Section 6409 Limits</u> | <u>AT&T's Proposed Modification</u> |
|--|---|---|
| Increase height of original structure | 10 feet or less | No increase in height |
| Antennas extending horizontally from edge of structure | 6 feet or less | Antennas extend 0 feet horizontally from edge of structure |
| Additional equipment cabinets | 4 or fewer (does not include separately mounted radios and other pieces of equipment); no new ground-mounted cabinets if there were none before; if there were ground-mounted cabinets, then no new ground-mounted cabinets more than 10% larger than the existing cabinets | 0 additional equipment cabinets; No new ground-mounted cabinets |

Concealment Elements

The existing wireless facility is a stealth-designed facility, consisting of a stealth/screen wall. The proposed minor modification will continue to effectively stealth the wireless facility by remaining behind the existing screen wall and therefore will not defeat the existing concealment.

FCC Shot Clock for Section 6409 Minor Modifications

AT&T requests approval of the following applications, as well as any other authorizations necessary, for its proposed minor modification under Section 6409:

- Planning Permit Application (Basic Use Permit)

The FCC requires that all authorizations related to 6409 applications be completed within 60 days after filing.

Based on a filing date of 7/31/2024, the projected shot-clock deadline for a decision is 9/30/2024. Our goal is to work with you to obtain approval of this minor modification earlier than the deadline. We will respond promptly to any requests for information you may have for our application. Please let us know how we can work with you to expedite the approval process. We look forward to working with you on this important project, which will significantly improve wireless telecommunication services in your community without requiring an additional site. Should you have any questions or require additional information, please do not hesitate to contact me.

Sincerely,

Jenelle Humphrey
